

# ***GRADUATE OUTCOMES REPORT***

**Undergraduate Class of 2023**

***Center for Career & Professional  
Development at  
Adelphi University***

**Prepared By: Thomas J. Ward, Antonella Sullivan, Chavinth Nadeish  
Asokan & Husein Ghadiali**

# Methodology

The Center for Career and Professional Development at Adelphi University annually surveys graduating students to ascertain their employment status or plans for continuing education, as well as to acquire insights into hiring trends. Our survey aligns with the National Association of Colleges and Employers (NACE) First Destination Survey to track the progress of new college graduates as they enter the job market.

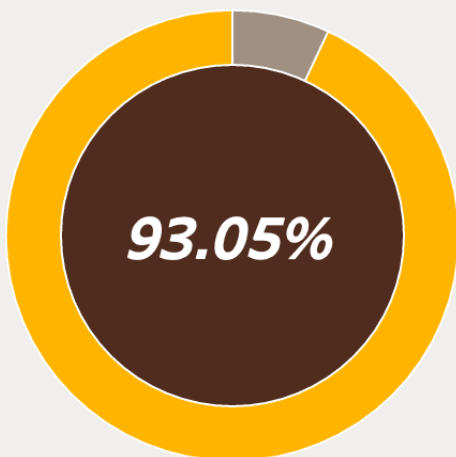

Graduate outcomes and salary data results are based on data collected up to 1-year post graduation from the Graduate Outcomes Survey, self-reported information, LinkedIn, National Clearinghouse, and online research of salary ranges associated with related job titles/descriptions.

Each graduating class is made up of students who graduate from July 1 through June 30; thus, the Class of 2023 is composed of students who graduated from July 1, 2022 through June 30, 2023. This report examines the career outcomes of **1,289 Undergraduates** who earned their Adelphi degree in August 2022, December 2022, or May 2023. Students were surveyed just prior to and up to one year after graduation, during three survey administration periods: August 2022-February 2023, December 2022-June 2023, and May 2023-November 2023. This is consistent with the definition used by the U.S. Department of Education in gathering education statistics for its IPEDS database.

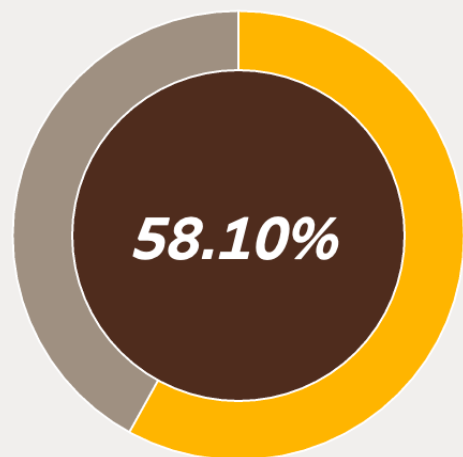

The Career Outcomes Rate for the academic year 2022-2023, that includes cohorts August '22, December '22 or January '23, and May'23 is **93.05%**. We also follow NACE protocols to determine the Knowledge Rate\*\* which is **58.10%** for the Class of 2023.

---

## Career Outcomes Rate for UG 2023

## Knowledge Rate

*Note: The term "Career Outcomes Rate" is the percentage of graduates who have reported being engaged in a career outcome. This percentage is calculated by determining the number of respondents employed full or part-time, continuing their education, volunteer service or military service, and dividing that total by the number of students about whom we have information. The term "Knowledge Rate" is the percentage of graduates for which we have reasonable, verifiable information concerning graduates' post-graduation career plans. Data can be collected from sources including graduation surveys, online surveys, telephone and email solicitations, alumni records, social media research, and input from faculty, staff, and employers.*
